**REISSUE DECLARATION**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

We, Nicholas P. Van Brunt and Donald J. Gagne declare that we are the named inventors of U.S. Patent 6,036,662; and that we verily believe that U.S. Patent 6,036,662 is partly inoperative by reason of our claiming more or less than we had a right to claim in the patent.

We claimed less than we had a right to claim in U.S. Patent 6,036,662 for at least the following reasons: We failed to claim less than we had a right to claim regarding continuously varying the output pressure of the continuous air flow generator in order to maintain the peak pressure generated by the positive air flow generator at a predetermined value.

All errors in the present reissue application up to the time of signing of this declaration arose without any deceptive intention on our part.

We believe ourselves to be the original and first inventors of the subject matter which is claimed and for which a reissue patent is sought.

We acknowledge our duty to disclose to the Patent and Trademark Office all information known to us to be material to patentability in accordance with 37 C.F.R. §§ 1.56.

We further declare that all statements made herein of our own knowledge are true and all statements made on information and belief are believed to be true; and further, that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
